PROGRAM OVERVIEW

This program guide provides an overview of the 2023 Global Quality Pay for Performance (GQ P4P) Program for Independent Physician Associations (IPAs). In this eighth year of the program, IEHP has made program enhancements based on feedback from Providers in an effort to continually improve effectiveness. The IEHP GQ P4P Program for IPAs is designed to reward IPAs for high performance and year-over-year improvement in key quality performance measures. This program guide is designed as an easy reference for IPAs and their staff to understand the GQ P4P Program.

This year's GQ P4P Program continues to provide financial rewards to Providers for improving health care quality across multiple domains and measures. The 2023 Global Quality P4P Program includes core measures, process measures and penalty "risk" measures.

IEHP also encourages all IPAs to attend IEHP P4P meetings that are held throughout the year to support your efforts to maximize earnings in this program.

If you would like to get more information about IEHP's GQ P4P Program or best practices to help improve quality scores and outcomes, visit our secure Provider Portal at www.iehp.org, email the Quality Team at QualityPrograms@iehp.org or call the IEHP Provider Relations Team at (909) 890-2054.

What's New?

Two measures were added

- Electronic Medical Record Connections
- HbA1c Lab Results Data Completeness

One measure was retired

- Integrated Healthcare Association Participation

Two measures were revised

- Adult Influenza Vaccine
- Colorectal Cancer Screening

Eligibility and Participation

To be eligible for incentive payments in the 2023 GQ P4P Program, IPAs must meet the following criteria:

- Have at least 5,000 IEHP Medi-Cal Members assigned as of January 2023.
- Have at least 30 Members in the denominator as of December 2023 for each quality measure to qualify.
- Submit a GQ P4P Quality Work Plan to IEHP by April 28, 2023 in order to enroll in the program (see Work Plan details in [Appendix 10](#)).
- Meet minimum Encounter Data Gates in order to qualify for incentive payments.
- IPA must designate a Quality Team of two to four staff dedicated to quality improvement work for the IPA. Quality Team framework will require an attestation and submission of staffing plan by 7/1/2023.

Minimum Data Requirements

Lab Results

Data from lab results is also foundational to Program performance scoring. Providers should ensure they submit complete lab results data for services rendered to IEHP Members. IPAs should work with their network Providers to ensure they are using the appropriate lab vendors for IEHP Members, and submitting complete lab results data to IEHP.

Lab results that are performed in the office (e.g., point of care HbA1c testing, urine tests, etc.) should be coded and submitted through Providers' encounter data.

Immunizations

To maximize performance in immunization-based measures, **IEHP requires all Providers to report all immunizations via the California Immunization Registry (CAIR2)**. For more information on how to register for CAIR2, please visit <http://cairweb.org/>. IEHP works closely with CAIR to ensure data sharing to support the GQ P4P program.

Provider P4P Research Inquiries

All Provider research inquiries, related to the data collected to measure P4P metrics, must be submitted in an excel worksheet. The following information must be included in the research inquiry to support the description of the dispute: Provider Name, Provider NPI, Member Name, Member ID, Measure Name, DOS, Procedure Code/ICD-10 code, and any other information that would be helpful to research the inquiry.

Supplemental Data

What is Supplemental Data?

When services are not captured in traditional encounter data systems, other Supplemental Data sources may be used to collect information about services rendered to Members to support Quality Reporting.

When Supplemental Data may be needed

- For services that were provided prior to eligibility with IEHP
- When a Provider has “proof-of-service” for a noted gap in care (e.g., cervical cancer screening, immunizations rendered by another provider)
- When a Provider has “proof-of-service” for an eligible-population exclusion (e.g., total hysterectomy, bilateral mastectomy)

How to use Supplemental Data to support Global Quality P4P

Create an electronic log that includes the minimum required data elements. See [Appendix 11](#) for file layout requirements. Below is a list of minimum data elements needed in a supplemental data log.

- Member ID
- Date of Service
- Provider Identification
- Provider Specialty
- Diagnosis Code(s) – if applicable
- Procedure Code(s)
- Lab Results – if applicable

Requirements for using Supplemental Data in Global Quality P4P Reporting

- The IPA must have clearly defined policies and procedures (in writing) that describe how Supplemental Data is collected, validated and used for P4P reporting
- Policies/procedures must be shared with IEHP and must be in place to validate quality / accuracy of Supplemental Data
- The IPA must collect “proof-of-service” documentation to confirm all services that are reported in the Supplemental Data log
- The IPA must receive approval from IEHP’s Quality Team to use Supplemental Data in Global Quality Reporting (deadline for approval is October 31, 2023)
- The IPA must complete IPA data validation activities prior to submitting Supplemental Data to IEHP no later than November 30, 2023
- The IPA must submit an audit-ready Supplement Data log to IEHP via SFTP no later than November 30, 2023
- The IPA must complete a P4P Roadmap no later than December 1, 2023

Data Validation Requirements for Supplemental Data in Global Quality P4P Reporting

- To be counted in the final IPA Global Quality P4P rates, the Supplemental Data file must pass IEHP's independent HEDIS® audit process
- The IPA must present “proof-of-service” documents within required timeframes when requested by IEHP's auditors
- An auditor review will compare “proof-of-service” documents to submitted data
- Supplemental Data records must pass 100 percent validation to be included in the final P4P reporting

Program Terms and Conditions

- **Good Standing:** A Provider currently contracted with Plan for the delivery of services, not pursuing any litigation or arbitration or has a pending claim pursuant to the California Government Tort Claim Act (Cal. Gov. Code sections 810, et seq.) filed against Plan at the time of program application or at the time additional funds may be payable, and has demonstrated the intent, in Plan's sole determination, to continue to work together with Plan on addressing community and member issues. Additionally, at the direction of the CEO or their designee, Plan may determine that a provider is not in good standing based on relevant quality, payment, or other business concerns.
- Participation in IEHP's GQ P4P Program, as well as acceptance of incentive payments, does not in any way modify or supersede any terms or conditions of any agreement between IEHP and Providers or IPAs, whether that agreement is entered into prior to or subsequent to the date of this communication.
- There is no guarantee of future funding for, or payment under, any IEHP Provider incentive program. The IEHP GQ P4P Program and/or its terms and conditions may be modified or terminated at any time, with or without notice, at IEHP's sole discretion.
- Criteria for calculating incentive payments are subject to change at any time, with or without notice, at IEHP's sole discretion.
- In consideration of IEHP's offering of the IEHP GQ P4P Program, participants agree to fully and forever release and discharge IEHP from any and all claims, demands, causes of action, and suits, of any nature, pertaining to or arising from the offering by IEHP of the IEHP GQ P4P Program.
- The determination of IEHP regarding performance scoring and payments under the IEHP GQ P4P Program is final.
- As a condition of receiving payment under the IEHP GQ P4P Program, Providers and IPAs must be active and contracted with IEHP and have active assigned Members at the time of payment.

Financial Overview

Providers are eligible to receive financial rewards for performance excellence and for performance improvement. Financial rewards are based on a tiered system, providing increasing financial rewards as IPAs reach each level of higher performance. The 2023 GQ P4P Program incentive pool is \$45 million for the IPA Program. Incentive dollars for the 2023 performance period will be distributed via a monthly Per Member Per Month (PMPM) Quality Payment beginning in July 2024 and continuing through June 2025. Based on IPA performance, payment methodologies may be adjusted to ensure that the 2023 program year costs do not exceed this \$45 million pool for the IPA Program.

IPA Encounter Data Gates

IPA encounter data submissions must meet minimum adequacy requirements in order to receive GQ P4P Program incentive dollars. IPA encounter data performance is based on all professional encounters submitted by the IPA for services rendered during the measurement year (e.g., 2023 dates of service). IPA encounter data volume will be compared to established encounter data benchmarks for Seniors and Persons with Disabilities (SPD) and Non-SPD Members. IPA performance will be calculated against each IPA's proportion of SPD and Non-SPD Members.

Encounter data benchmarks have been established and correspond to an Encounter Data Gate, reflecting higher encounter data volumes. As IPAs reach higher levels of encounter data performance, they become eligible for a larger percentage of the total possible GQ P4P incentive. Encounter rates are expressed as the number of encounters per Member per year (PMPY). An encounter is defined as a unique visit per Member per Provider per day. The table below describes the Encounter Data Gates, performance levels, and their impact on IPA GQ P4P Program incentive payments.

PERCENT OF POSSIBLE INCENTIVE PAYMENT	ENCOUNTER DATA GATE	NON-SPD PMPY	SPD PMPY
50%	Gate 1	3.0	9.0
75%	Gate 2	4.0	11.0
100%	Gate 3	5.0	13.0

Encounter data must be submitted to IEHP in a timely way and must adhere to the reporting timeframes delineated in IEHP's Provider Policy and Procedure Manual - Policy MC_21A.

CORE MEASURES

Performance Measures

Appendix 1 provides a list of the 37 measures in the 2023 GQ P4P Program and includes the thresholds and benchmarks associated with respective tier goals. These measures are categorized into five domains: *Access; Clinical Quality; Behavioral Health Integration; Patient Experience; Encounter Data*.

Most measures included in the *Clinical Quality Domain* primarily use standard Healthcare Effectiveness Data and Information Set (HEDIS®) process and outcomes measures that are based on the specifications published by the National Committee for Quality Assurance (NCQA). Non-HEDIS® measures that are included in the program come from the California Department of Health Care Services (DHCS) Medi-Cal Managed Care Quality Program and the Pharmacy Quality Alliance (PQA).

Clinical Quality Domain Measures:

- Asthma Medication Ratio
- Breast Cancer Screening
- Cervical Cancer Screening
- Child and Adolescent Well-Care Visits
- Childhood Immunization – Combo 10
- Chlamydia Screening in Women
- Colorectal Cancer Screening
- Controlling High Blood Pressure
- Diabetes Care – Blood Pressure Control <140/90
- Diabetes Care – Hemoglobin A1c Control Patients with Diabetes
- Diabetes Care – Kidney Health Evaluation
- Developmental Screening
- Adult Influenza Vaccine
- Immunizations for Adolescents – Combo 2
- Initial Health Appointment
- Post Discharge Follow-Up
- Statin Therapy Received in Patients with Cardiovascular Disease and Diabetes
- Use of Imaging Studies for Low Back Pain
- Weight Assessment and Counseling for Nutrition and Physical Activity for Children and Adolescents
 - Counseling for Physical Activity
 - Counseling for Nutrition
 - BMI Percentile
- Well-Child Visits in the First 15 Months of Life
- Well-Child Visits in the First 30 Months of Life

IEHP's HEDIS® measurement year 2023 data set and Managed Care Accountability Set (MCAS) will be used to evaluate Providers' year-end performance. These measure sets undergo an independent audit review prior to rate finalization.

The Initial Health Appointment (IHA) measure follows IEHP's IHA internal compliance monitoring methodology and is not a HEDIS® measure.

The Post Discharge Follow-Up measure is an IEHP-defined measure developed to support transitions of care needs of IEHP Members.

Access Domain:

- After Hours Availability - On-Call Physician Access
- After Hours Availability - Life-Threatening Emergency Calls
- Appointment Availability - Urgent
- Appointment Availability - Routine
- Potentially Avoidable Emergency Department (ED) Visits

The *Access* measures are based on the Department of Managed Health Care (DMHC) and NCQA requirements for monitoring access to care across the network. See [Appendix 2](#) for measure details.

Behavioral Health Integration Domain Measures:

Measures in this domain come from various measure stewards including: the National Quality Forum (NQF), HEDIS, and the Department of Health Care Services (DHCS).

- Antidepressant Medication Management
- Screening for Clinical Depression in Primary Care
- Substance Use Assessment in Primary Care for Adolescents
- Substance Use Assessment in Primary Care
- Social Determinants of Health Screening
- Social Determinants of Health Identification Rate

Patient Experience Domain Measures:

Patient Experience Domain measures include Member Satisfaction Survey questions from the Consumer Assessment of Healthcare Providers and Systems (CAHPS) survey that is published by the Agency for Healthcare Research and Quality (AHRQ). IEHP conducts a Member Satisfaction Survey that is a modified CAHPS survey and is the sole data source used for this measure domain. The IEHP Member Satisfaction Survey is conducted between June and December of each year. Surveys received from the 2023 Member Satisfaction Survey will be used to calculate the Patient Experience Domain measures. Below are the three areas included in the Patient Experience Domain for the 2023 program.

- Access to Care Needed Right Away
- Coordination of Care
- Access to Routine Care

Scoring Methodology

Payments within the core program will be awarded to IPAs based on individual performance in reaching established Quality Goals (e.g., Tier Goals for each measure).

In the *Clinical Quality Domain*, HEDIS® measure results are based on each measure's total eligible population assigned to the IPA. The eligible population is defined as the set of Members that meet the denominator criteria specified in each measure. Members in the eligible population are attributed to the assigned PCP on the anchor date of each measure, as defined within each measure. Members contribute to a IPA's measure denominator if continuous enrollment criteria are met at the health plan level. For each measure, the measure score reflects the proportion of the eligible population that complies with the numerator criteria. For measures that are based on the HEDIS methodology, IEHP will adhere to the most current HEDIS technical specifications (Volume 2) for determining both numerators and denominators.

In the Clinical Quality Domain, non-HEDIS measures include the Initial Health Appointment and the Post Discharge Follow-Up measure. Each measure was designed by IEHP using validated coding and technical specifications. The Initial Health Appointment Measure is based on DHCS requirements and includes new health plan Members who are assigned to the IPA during the measurement year and who remain enrolled with IEHP and the IPA through the end of the 120 day post-enrollment period. The Post Discharge Follow-Up measure is described in detail in Appendix 2.

In the *Access Domain*, PCP telephone handling for appointments and after hours access is assessed via Plan-conducted phone surveys. IEHP follows the DMHC Timely Access Standards Provider Appointment Availability Study methodology to assess PCP adherence to Appointment Availability Standards. IEHP follows the NCQA standards of assessing PCP adherence to After Hours access to care and call handling protocols.

In the *Patient Experience Domain*, monthly Member Satisfaction Survey measures are based on Members who meet eligibility criteria to receive a mailed survey between June and December of the measurement year. Members eligible to receive a Member Satisfaction Survey must have been continuously enrolled with IEHP for at least six months in the measurement year (2023) and must have had an office visit in the prior six months, based on encounter data submitted to IEHP. Members who meet the survey eligibility criteria are randomly sampled to receive a survey. Survey measure results are attributed to the Member's assigned IPA based on the most recent encounter that qualified the Member for the survey. A Member is eligible to receive only one survey per calendar year.

Payment Methodology

IPA performance for each quality measure will be given a point value (i.e., a Quality Score). Points are assigned based on the Tier Goal achieved (i.e., Tier 1 = one point, Tier 2 = two points, Tier 3 = three points) for each measure.

IPAs who have at least three quality measures that meet the minimum denominator size (n = 30) will be considered for payment calculations. An overall weighted average of all eligible Quality Scores will determine the overall GQ Performance Score. Individual measure weights will be assigned as follows:

- Process measures (such as screenings) are given a weight of 1
- Patient experience measures are given a weight of 1.5
- Outcome and intermediate outcome measures (e.g., HbA1c or blood pressure control and childhood immunizations) are given a weight of 3

Please reference Appendix 1 for a list of individual measure weights for the 2023 GQP4P measure set.

The following formula will be used to calculate the overall **GQ Performance Score**:

GQ Performance Score (i.e. overall weighted average) = $\frac{\text{Sum (measure tier} \times \text{measure weight)}}{\text{Sum of measure weights}}$

GQ P4P Program payments will be awarded according to the following formula:

$$([\textit{Global Quality Performance Score}] \times [\textit{\# Medi-Cal Average Member Months}] \times [\textit{GQ P4P Multiplier}] / [\textit{Total Medi-Cal Member Months}]) + \textit{Bonus Bundles} + \textit{Process Measures} - \textit{Penalty Measures} = \textit{GQ P4P PMPM Bonus}$$

The GQ P4P payment multiplier is subject to change based on Network performance and budget limits. The GQ P4P payment multiplier value displayed in the Interim Reports may not be the final value used in determining final Quality PMPM payment amounts.

IPA PMPM Quality Payment Methodology

From July 2024 – June 2025, IPAs will receive a monthly Quality PMPM (per member per month) payment based on their 2023 GQ P4P performance using the following formula:

$$\frac{\text{2023 Global Quality P4P Final Incentive Amount}}{\text{Total Medi-Cal Member Months}} = \text{Quality PMPM Payment Amount}$$

IPA payment example: *IPA with monthly average of 120,000 Members (1,440,000 Member Months), 2.0 GQ Quality Score and Encounter Data Gate 3 met*

$$\frac{\text{(A) Global Quality P4P Final Incentive Amount: \$3,720,000}}{\text{Total Member Months: 1,440,000}} = \text{Quality PMPM Payment Amount: \$2.58}$$

~ \$309,600 monthly payment*
~ \$3,715,200 annual payment*

*Assuming stable membership volume and there is no additional incentive for bonus bundles, or process measures, and no PCP penalty to be deducted from the Quality PMPM bonus.

Note: Members with and Other Health Coverage will be removed from the measure denominators before the final payment calculation.

Post Discharge Follow-Up

Methodology: IEHP-Defined Measure

Measure Description: The percentage of Members, 18 years and older who have follow-up visits with a Provider within required timeframes. For this measure, two rates are calculated and the average of both rates are used as the final score.

Rate 1: Follow-Up Visit High-Risk Members – this measure assesses the percentage of Members identified as “high-risk” who were discharged from an acute or nonacute inpatient stay during the measurement year who also had a follow up visit with a provider within seven days of discharge.

Rate 2: Follow-Up Visit with non-High-Risk Members - this measure assesses the percentage of members identified as “low or rising risk” who were discharged from an acute or nonacute inpatient stay during the measurement year who also had a follow up visit with a provider within 30 days of discharge.

As part of IEHP’s population health strategy, all IEHP Members are designated a risk level based on all available utilization and diagnostic data available to the plan. Members fall into one of three risk categories: High, Rising and Low Risk. IEHP leverages the John Hopkins ACG System to determine Member risk level using industry-validated risk stratification algorithms. For this measure, IEHP is leveraging the ACG risk marker called “Probability of Total High Cost” and has designated “high-risk” Members to be defined as those who have a probability score of ≥ 0.5 at the time of discharge.

- The eligible population in this measure meets all of the following criteria:
 1. Members who are 18 years of age, or older, by December 31, 2023
 2. To be eligible for this measure, IEHP Members must be enrolled with IEHP on the date of the discharge through 30 days after the discharge (31 total days)
 3. Discharged to home from an acute or nonacute inpatient hospital stay during the measurement year (2023)

This risk score is available for every IEHP Member on the IEHP Provider Portal and can be accessed by following these steps:

To view an IEHP Member’s risk score and hospital discharge details, Providers can leverage the Inpatient Discharge Roster by logging in to the secure IEHP Provider Portal.

Inpatient Discharges
 Members on this list have recently been discharged from a hospital and require a follow up visit. IEHP recommends that this visit is completed no later than the date displayed on the roster below in the "Follow up by" column.

Use of Imaging Studies for Low Back Pain (LBP)

Summary of Changes to the 2023 Global Quality P4P Program Guide:

- Update to the exclusions

Methodology: HEDIS®

Measure Description: The percentage of Members 18 - 75 years of age with a primary diagnosis of low back pain who did not have an imaging study (plain X-ray, MRI, CT scan) within 28 days of the diagnosis. The measure is reported as an inverted rate [1 – (numerator/eligible population)]. A higher score indicates appropriate treatment of low back pain (i.e., the proportion for whom imaging studies did not occur).

- Index Episode Start Date (IESD). The earliest date of service for an eligible encounter during the Intake Period with a principal diagnosis of low back pain.
- A period of 180 days (six months) prior to the IESD when the member had no claims/encounters with any diagnosis of low back pain.

Exclude Members with any of the following:

- In *hospice* or using hospice services during the measurement period (2023).
- *Cancer*. Cancer any time during the Member's history through 28 days after the IESD.
- *Recent trauma*. Trauma any time during the three months (90 days) prior to the IESD through 28 days after the IESD.
- *Intravenous drug abuse*. IV drug abuse any time during the 12 months (one year) prior to the IESD through 28 days after the IESD.

Weight Assessment and Counseling for Nutrition and Physical Activity for Children and Adolescents (WCC)

Summary of Changes to the 2023 Global Quality P4P Program Guide:

- Update to the exclusions

Methodology: HEDIS®

Measure Description: The percentage of Members 3-17 years of age who had an outpatient visit with a PCP or OB/GYN and who had evidence of the following during the measurement year (2023). Report each of the three indicators below:

- BMI percentile documentation*
- Counseling for nutrition
- Counseling for physical activity
- The eligible population in this measure meets all of the following criteria:
 1. Members who are 3-17 years of age as of December 31 of the measurement year (2023).
 2. Continuous enrollment with IEHP in the measurement year (2023) with no more than one gap up to 45 days.
 3. An outpatient visit with a PCP or an OB/GYN during the measurement year (2023).

* Because BMI norms for youth vary with age and gender, this measure evaluates whether BMI percentile is assessed rather than an absolute BMI value.

Initial Health Appointment (IHA)

Methodology: IEHP-Defined Quality Measure

Measure Description: The IHA is a comprehensive assessment that is completed during the Member's initial encounter with a PCP, appropriate medical specialist, or Non-Physician Medical Provider, and it must be documented in the Member's medical record. The IHA enables the Member's PCP to assess and manage the acute, chronic and preventive health needs of the Member.

IEHP provides PCPs with a monthly detailed Member roster on the secure IEHP Provider Portal for all newly enrolled IEHP Members who are due for an IHA at 120 days of enrollment.

- The eligible population is newly assigned Members with an IEHP effective enrollment date of January 1, 2023 through December 31, 2023. The IHA must be provided within 120 days of enrollment (e.g., Member enrolled in December 2023 must be seen by April 2024 and PCP must submit encounter by May 2024).
- IHA visits completed during the 11 months prior to enrollment with IEHP count towards numerator compliance.

An IHA must include all of the following:

- A history of the Member's physical and mental health
- An identification of risks
- An assessment of need for preventive screens or services
- Health education
- The diagnosis and plan for treatment of any diseases

After Hours Availability On-Call Physician Access

Methodology: IEHP-Defined Provider Access After Hours Survey

Measure Description: The Provider After Hours measure assesses Provider office call handling protocols for after hours access. IEHP conducts a one time annual call campaign to assess Provider network compliance. Physician offices are compliant if during the call, they followed the protocol below:

- The caller was provided with instructions on how to connect to Doctor, on-call physician or covering nurse after hours OR was connected directly to Doctor, on-call physician or covering nurse.
- Provider must inform the Member to expect a call back within 30 minutes.

Measure Support: The Provider Access After Hours call campaign is conducted annually to assess the after hours accessibility of Providers within the IEHP network. Specifically, the calls assess the after hours call handling protocol of contracted Primary Care.

This measure is used to monitor Provider compliance with IEHP's Access Standards in policy 9A, ensuring that IEHP Members have appropriate guidance and access if care is needed from their Providers after office hours.

Potentially Avoidable Emergency Department (ED) Visits

Methodology: IEHP has developed this measure in accordance with the New York University (NYU) research conducted on classifying emergency department utilization (<https://wagner.nyu.edu/faculty/billings/nyued-background>) and the California Department of Healthcare Services (DHCS) methodology for determining Low-acuity non-emergent (LANE) visits.

Measure Description: Low-acuity non-emergent (LANE) visits are visits to an emergency department (ED) in which the condition could be treated by a physician or other health care provider in a non-emergency setting or conditions that are potentially preventable or ambulatory care sensitive.

The following steps are used to determine potentially preventable emergency room visits:

Step 1: Identify all Emergency Department (ED) visits that contain potentially preventable diagnosis codes on both the facility and professional claims in the measurement year (2023).

Step 2: The following criteria is assessed to exclude ED visits:

- ED visits that resulted in an inpatient admission or observation stay
- Members under the age of 4 or over the age of 65 on the date of service
- ED visits with evaluation & management codes 99284 and 99285

Step 3: Using the primary diagnosis code on the facility component of the ED visit, preventable percentages are assigned to each ED event to account for external factors that can influence and impact variation in ED use. These “preventable percentages” for each ED visit are summed to create a final “count” of preventable ED visits based on the primary diagnosis code on the facility component of the ED visit. The attached worksheet contains the diagnosis codes and preventable percentages assigned to each code (<https://www.iehp.org/en/providers/p4p-prop56-gemt?target=p4p-program>).

Denominator: All assigned Medi-Cal Members each month of the measurement year (2023). All monthly assigned Members are summed to create a denominator. This is also called Member Months.

Numerator: The sum of the output from Step 3 noted above for Members assigned to the IPA on the date of service. This is the final count of preventable ED visits.

Rate: (Numerator / Denominator) x 12,000

PROCESS MEASURES

Process Measures

Process measures allow IPAs to earn additional dollars based on performance in process metrics. IEHP is committed to reward IPAs who have high performance in quality metrics that assist in providing quality care to IEHP Members.

For the 2023 program year, IPAs can earn an additional PMPM up to \$0.25 per process measure if target goals are met. Please see Appendix 3 below for measure details.

Note: The Manifest MedEx (MX) Connectivity process measure is unique and expands over a two-year measurement window (2022-2023). Providers who did not meet the Manifest MedEx Connectivity measure in the 2022 performance year will have the opportunity to earn incentive dollars for the Manifest MedEx Connectivity measure in 2023. The PMPM dollars will be rewarded once the implementation is complete. Providers must continue the MX connection throughout the time period they are receiving the MX Process measure Quality PMPM.

APPENDIX 3: 2023 IPA Global Quality Process Measures

2023 GLOBAL QUALITY IPA PROCESS MEASURE LIST

Measure Name	Goal
HIE Connectivity	25% of PCPs connected & reporting by the following deadlines: 1) PCPs sign a participation agreement with MX by June 1, 2023. 2) PCPs establish data connections with MX and reporting CCDAs by December 2023.

APPENDIX 4: Process Measure Overview

NEW Electronic Medical Record Connections

Methodology: IEHP-Defined Process Measure

Measure Description: The count of IPA Primary Care Physicians (PCPs) electronic medical record (EMR) systems connected directly to IEHP.

Denominator: Top five (5) high volume PCPs in the IPA's network, with at least 1,000 assigned IEHP Medi-Cal Members, as of June 30, 2023. IPAs should refer to eligibility data provided by IEHP, through the 834 eligibility file, to identify PCPs.

Numerator: Established EMR connections with eligible Providers within the denominator. Any EMR that has capability to connect to IEHP will be included.

- Connections will need to be established by December 1, 2023.

Note: IEHP must have connection to the Providers EMR system throughout the time period the IPA is receiving the Electronic Medical Record Connections process measure Quality PMPM.

NEW HbA1c Lab Results Data Completeness

Methodology: IEHP-Defined Process Measure

Measure Description: The percentage of complete, timely and accurate data submitted through standard reporting channels for all HbA1c lab tests rendered to IEHP Medi-Cal Members in the measurement year (2023).

Denominator: The sum of all unique HbA1c tests submitted for Medi-Cal Members.

- (e.g., unique Member, date of service) in the measurement year (2023).

Numerator: The sum of all valid results for the HbA1c tests identified in the denominator.

Measure Support: To ensure IEHP receives accurate lab result data from IEHP contracted Medi-Cal Providers as lab data is an essential data source in performance reporting.

Goal: $\geq 80\%$ of data submitted through standard reporting channels for all HbA1c tests rendered to IEHP Medi-Cal Members in the measurement year (2023) are complete, timely and accurate.

Manifest MedEx (MX) Connectivity

Methodology: IEHP-Defined Process Measure

Measure Description: Participating PCPs are encouraged to connect their electronic health record (EHR) systems to the regional Health Information Exchange (Manifest MedEx).

- Anchor Date: June 30, 2023

Goal: Increase PCP connections to Manifest MedEx with an aim to improve patient care and coordination.

Two Milestones will need to be met by your PCPs.

1. PCPs sign a participation agreement with MX by June 1, 2023.
2. PCPs establish data connections with MX with routine reporting of CCDAs by established deadline.
 - Providers must pass primary source verification (PSV) with MX.
 - Once PSV is completed, active data sharing must be confirmed by MX.
 - Deadline will be set based on the volume of PCPs who sign up.
 - Goal is by December 2023, may extend out further, based on MX connectivity capability.

As part of the PSV process, Providers will be required to pass the following elements in order to meet the data quality requirement of this measure.

All EHR printouts must meet the “Golden Rule” and be considered a “Robust” case. Any documentation missing this information is considered incomplete and will fail PSV for this measure.

Golden Rule:

- Patient Name
- Facility Name
- Target Date of Service (DOS)
- Date of Birth
- Provider Name
- Time of Service (TOS) – If applicable

Robust Case:

- Patient Race / Ethnicity
- Problem List containing all PX codes and/or Descriptions
- Procedures Codes and/or Description
- Vitals
- Immunizations
- Labs (when applicable)

Financial incentive awarded if the following is met: 25% of your PCPs connected and reporting to MX by the above deadlines.

Equity Quality Improvement Activity #1: Reducing Health Disparities

Methodology: IEHP-Defined Process Measure

Measure Description: The Department of Health Care Services (DHCS) has made health equity and reducing disparities in health care a central area of focus in its Quality Strategy. The intent is for IPAs to develop a quality improvement activity with an emphasis on driving improvements in health equity and identifying health disparities and their root causes.

Goal: Engage IPAs in quality improvement work focused on health equity and reducing health care disparities among their IEHP Medi-Cal Members.

1. Establish an improved quality improvement project (a continuation of the 2022 Quality Improvement Reducing Health Disparities Activity), to reduce health disparities and calculate baseline rates. Share project details with IEHP.
 - April 30, 2023
2. Share project outcomes with IEHP.
 - By March 31, 2024

Quality Improvement Activity #2: Potentially Avoidable ED Visits or Potentially Preventable Admissions

Methodology: IEHP-Defined Process Measure

Measure Description: As part of its rate development process, the Department of Health Care Services (DHCS) penalizes health plans that have a high rate of avoidable emergency room visits or potentially preventable admissions. The intent for this process measure is for IPAs to develop a quality improvement activity aimed at reducing avoidable emergency room visits or potentially preventable admissions among Members with diabetes or heart failure.

Goal: Engage IPAs in quality improvement work focused on reducing avoidable emergency room visits or potentially preventable admissions among their IEHP Medi-Cal Members with diabetes or heart failure.

1. Establish an improved quality improvement project (a continuation of the 2022 Quality Improvement Reducing Potentially Avoidable ED Visits or Potentially Preventable Admissions Activity) to reduce avoidable emergency room visits or potentially preventable admissions and calculate baseline rates. Share project details with IEHP.
 - By April 30, 2023
2. Share project outcomes with IEHP.
 - By March 31, 2024

Bonus Bundles

The bonus bundle measures allow IPAs the opportunity to obtain additional P4P incentive earnings towards their monthly Quality PMPM. All goals within the bundle must be met in order to earn. IPAs can earn up to an additional \$0.25 PMPM per bonus bundle for meeting all the bonus bundle goals.

PENALTY MEASURES

Penalty Measures

Provider payment models have been evolving away from traditional fee-for-service and moving toward payments for quality and value. Frameworks supporting alternative payment models have been developed by the Centers for Medicare and Medicaid Services (CMS) and the Department of Healthcare Services (DHCS). IEHP is committed to investing in alternative payment models that pay for quality and provide value. In the spirit of evolving our alternative payment models, IEHP is introducing “risk” as a component in the Global Quality P4P Program. This movement will focus on measures that:

- Are within a Provider’s scope of care and influence
- Are within a Provider’s control and influence
- Bring value to the organization

IEHP will be including two penalty measures in the Global Quality P4P Program for 2023:

- Provider Grievance Response Rate
- PCP Encounter Data Rate

Both measures represent processes within the PCP practice that are within the control of the Provider. These measures will be structured in a way that a Provider’s performance will be compared to a pre-determined target for the measurement period. Provider performance that meets or exceeds the target will result in no penalty or “risk.” Alternatively, Provider performance that falls below the established target will result in a financial penalty. The financial penalty will be taken from the Provider’s incentive earnings for the same measurement period. Financial penalties will not exceed the value of the incentive earnings within the measurement period.

Financial penalties for the 2023 program year will be capped at no more than \$0.50 PMPM.

Please see [Appendix 6](#) for penalty details.

APPENDIX 6: 2023 IPA Global Quality P4P Program Penalty Measures

2023 GQ P4P IPA PENALTY MEASURE LIST:		
Measure Name	Population	Goal
PCP Encounter Data Rate - SPD*	All	3
PCP Encounter Data Rate - Non-SPD*	All	2.5
Provider Grievance Response Rate	All	80%

*SPD: Seniors and Persons with Disabilities; Non-SPD: Non-Seniors and Persons with Disabilities

APPENDIX 7: *Penalty Measures Overview*

PCP Encounter Data Rate

Methodology: IEHP-Defined Risk Measure

Measure Description: Percentage of complete, timely and accurate encounter data submitted through standard reporting channels for all PCP services rendered to IEHP Members in the measurement year (2023).

Denominator: All assigned Medi-Cal Members each month of the measurement year (2023). All monthly assigned Members are summed to create the denominator.

Numerator: The sum of all unique PCP encounter (e.g., unique Member, Provider, date of service) in the measurement year (2023) for all assigned Members in the denominator.

Rate: A Per Member Per Year (PMPY) rate is calculated following this formula:
 $(Total\ unique\ PCP\ Encounters / Total\ Member\ Months) \times 12 = PMPY$

Measure Support: The purpose of the IEHP PCP Encounter Data Rate measure is to ensure IEHP receives adequate PCP encounter data from IEHP-Contracted Medi-Cal Providers. Encounter data is important to performance scoring and is essential to the success of the GQ P4P Program.

Provider Grievance Response Rate

Methodology: IEHP-Defined Risk Measure

Measure Description: The rate of timely responses to all Standard PCP Grievances in the measurement year (2023). IEHP will monitor PCP total standard grievance counts and count timely responses to those grievances throughout the measurement year (2023).

Denominator: Count of standard grievances sent to the PCP in the measurement year (2023).
- Denominator must be 10 or above for this measure.

Numerator: Count of timely responses to PCP grievances in the measurement year (2023).
- Timely responses are within 14 calendar days of the response request.

Measure Support: The purpose of the IEHP Provider Grievance Response Rate measure is to ensure IEHP Providers respond timely to the grievances of their IEHP Members. IEHP strives to provide excellent care to our Members and ensure they are satisfied with their health care. IEHP also needs the Providers perspective of what occurred in order to complete grievance investigations.
