Add Your Smartphone to CA Notify

California's Exposure Notification System

You have the power to protect yourself and your community from COVID-19. Add your phone to the fight.

It's easy. It's private. It's secure. It's 100% opt-in.

How it works:

- CA Notify is a completely voluntary and secure tool to notify people if they've been exposed to someone with COVID-19.
- Your privacy is protected. Your identity is not known and your location is not tracked
- CA Notify uses Bluetooth technology to exchange random codes with the phones of others who have also opted in.
- You will receive an anonymous alert only if you were in close contact with another CA Notify user who tests positive for COVID-19.
- You can choose to send an anonymous alert to other CA Notify users if you test positive for COVID-19.

How to opt in:

- iPhone users can enable Exposure Notifications directly from Settings:

    » Step 1: Open the Settings app

    » Step 2: Scroll to Exposure Notifications

    » Step 3: Turn on and select United States and California

- Android users can download CA Notify through the Google Play store and follow the prompts to activate.

Need help activating your phone or have questions?
