Subject: **UPDATE: Navigating the New Preventive Care Reports**

In our previous announcement, we shared that **many Preventive Care Rosters were integrated into the Reports tab** to provide comprehensive data reports that are designed to enhance user experience.

You voiced your concern and we heard you!

We recently updated the Preventive Care Roster to include reports for all **PCPs sharing the same TIN**.

The screenshot shows the IEHP Preventive Care Rosters interface. At the top, there is a blue header with the IEHP logo and the text 'Preventive Care Rosters'. A red 'New!' badge is in the top right corner. Below the header is a search bar labeled 'PCP Name'. The main content area is divided into two sections: 'Provider Name - Provider NPI - Office Number' and 'Program Year'. The 'Provider Name' section has a list of four items: 'Provider #1 - NPI - Office Number #1', 'Provider #1 - NPI - Office Number #2', 'Provider #2 - NPI - Office Number #1', and 'Provider #2 - NPI - Office Number #2'. The 'Program Year' section has two radio buttons: '2022' (selected) and '2023'. Below these sections is a label for 'Office Location'.

“Why the Changes to the Roster age groupings?”

Due to Healthcare Effectiveness Data and Information Set (HEDIS) changes, several measures categorized by certain age groups are no longer defined the way they were previously displayed in the Preventive Care rosters.

Here’s where to find Member information for specific age groups in the new Preventive Care Reports:

- ✓ **Well Child Measures:**
 - The 3–6-month wellness visits can be found in the “Well Child Visit 0-30 Months – First 15 Months (W30)” roster.
- ✓ **Adolescents Visits:**
 - Now available under the “Child and Adolescent Well-Care Visits (WCV)” roster.
- ✓ **Vaccines:**
 - Childhood Immunizations Status (CIS) – Combo 10 for children turning two years of age.
 - Immunizations for Adolescents (IMA) – Combo 2 for children turning 13 years of age.
- ✓ **Newborn Immunizations:**
 - For children between of 0-2 years of age. The Newborn Immunization Roster will help reach the CIS Combo 10 goal by managing and tracking newborn vaccinations.
