HIV Interprofessional Symposium

Saturday, December 2, 2023

7:45 a.m. – 4:45 p.m.

Held at the
Annenberg Health Sciences Building at Eisenhower
39000 Bob Hope Drive
Rancho Mirage, California 92270

Please join Eisenhower Health for our inaugural **HIV Interprofessional Symposium**. The guiding principles for this symposium are to educate and train health care professionals to address the health care needs of People with HIV (PWH) through interprofessional team-based learning, education, and collaboration.

KEYNOTE SPEAKER

Eric S. Daar, MD
Chief, Division of HIV
Medicine, Harbor-UCLA
Medical Center

Eric S. Daar, MD, is Chief of the Division of HIV Medicine at the Harbor-UCLA Medical Center, Professor of Medicine at the David Geffen School of Medicine at UCLA, and an investigator at the Lundquist Institute. He earned his medical degree from Georgetown University School of Medicine, and completed his internship, residency, and Infectious Diseases fellowship at Cedars-Sinai Medical Center. His clinical and research interests include pathogenesis and treatment of acute and chronic HIV infection, HIV/HCV co-infection, complications of HIV, and novel strategies for assessing and enhancing adherence to therapy.

Topics covered will include:

- KEYNOTE LECTURE: "HIV Pathogenesis and Cure"
- Latest treatments and use of long-acting injectable ART
- An HIV-based interprofessional approach for care
- Cardiovascular disease in people living with HIV
- Proactive approach to early detection of anal dysplasia and anal cancer
- Caring for the liver in people with HIV
- Prevention in the 21st century - PrEP, PEP and STIs
- Mental health in people living and aging with HIV, interventions and treatments
- Managing substance use and harm reduction
- Breastfeeding by mothers with HIV
- Effect of HIV on women
- Aging in the HIV population
- HIV: A pharmacist's perspective
- HIV/AIDS research
- Neurocognitive decline in the aging person with HIV

National AIDS Memorial Quilt

Selections of the **AIDS Memorial Quilt** will be on display at the **Annenberg Health Sciences Building**.

December 4 – 8, 2023

As the largest community arts project in the world, the AIDS Memorial Quilt is a teaching tool to help educate people about HIV/AIDS and its continued impact today, and to remember the 700,000 U.S. lives lost in the four decades since the first cases were reported. Quilt displays help support local HIV/AIDS service organizations and LGBTQ+ centers, and raise awareness about the issues of health and social justice.
