Subject: **Share with Us: Barriers to Topical Fluoride Application**

We are committed to optimal health and well-being of our pediatric Members. One of the key components in preventive care for children is the administration of topical fluoride. This simple but crucial treatment helps prevent dental caries, promoting long-term oral health.

Topical Fluoride for Children (TFL-CH) Measure Overview

We encourage you to review the Topical Fluoride for Children (TFL-CH) measure overview. This resource is part of the Quality Performance Learning Guide and provides a comprehensive understanding of the importance and implementation of this measure.

You can access the TFL-CH measure overview [here](#).

2024 Medical Record Review Standards (MRR)

In addition to understanding the TFL-CH measure, the 2024 Medical Record Review Standards (MRR) outlines the requirements for the documentation of Topical Fluoride administration.

Please review the 2024 Medical Record Review Standards (MRR) [here](#).

We Value Your Feedback

Please share your insight and experience in administering topical fluoride to patients under 21. We want to understand the challenges your practice faces in administering topical fluoride. By collecting insights on the barriers, training needs, and perceptions related to fluoride application, we will develop targeted interventions and resources to support topical fluoride application in primary care practices.

Please take 5 minutes to complete a brief survey by scanning the QR code. Your feedback is crucial to help us support our Providers and Members.
