Subject: Preventive Care Roster – AMR Update

A recent update has been made to the Asthma Medication Ratio (AMR) roster in the Preventive Care section of the secure Provider Portal.

The updated AMR roster now includes the total number of reliever medications, controller medications, total medications dispensed to the Member and the ratio of controller medications to reliever medications. This updated roster can be utilized to better understand the current ratio of medications dispensed to the Member to assist with AMR compliance status (ratio of 0.50 or higher is required for numerator compliance).

The screenshot displays the 'Asthma Medication Ratio' dashboard. On the left is a navigation menu with 'Preventive Care' selected. The main content area shows a search bar, a gauge chart indicating a 76.47% completion rate (with a 64.26% target), and a table of member data. The table has columns for Last Name, Date of Birth, AMR Completed, Relievers, Controllers, Total, and Ratio. A red box highlights the 'Relievers', 'Controllers', 'Total', and 'Ratio' columns in the table.

Last Name	Date of Birth	AMR Completed	Relievers	Controllers	Total	Ratio
		x	7	0	7	0.00
		✓	0	5	5	1.00
		✓	0	9	9	1.00
		✓	2	2	4	0.50
		x	8	7	15	0.47
		✓	3	5	8	0.63
		✓	8	11	19	0.58
		x	12	3	15	0.20
		✓	1	9	10	0.90
		x	6	1	7	0.14
