Subject: **REMINDER - Provider Survey for Prenatal Immunizations Due February 6**

Pregnant women are at a higher risk for vaccine-preventable diseases, and vaccination can provide protection for both mothers and their babies. An analysis of immunization rates over the years shows a decline in influenza vaccinations among our IEHP pregnant members.

This is a reminder that we are conducting a survey to gather insights from providers. Your feedback could help us identify barriers and increase Influenza and Tdap immunization rates for our pregnant members.

We kindly ask you to take five minutes to complete our brief survey by **no later than February 6, 2025**.

You can access the survey by clicking the [link](#) or scanning the QR code below with your mobile device.

Thank you for sharing your insights with us and for all you do to care for our community.

If you have any questions or interest in learning more about the OB P4P Program, please contact your Provider Relations Manager by calling IEHP's Provider Call Center at (909) 890-2054, (866) 223-4347 or email ProviderServices@iehp.org.
